To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name

Last = AKALASKACDLISFIVETHREEPERMITSAK

First = DRIVERKPERMITAKK

No Suffix

HC (from state P6)

Last= AKALASKACDLISFIVETHREEPERMI

First = DRIVERKPERMITAKK

No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is

P6DRIVERKSTRUTURED6666

, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK

No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,

Siri.

Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

I'm sorry...I went ahead and did C4, C5, C6 before I realized you only wanted C4-5. Is that ok, or do we need to go back? Otherwise, I'm ready for C7 and C8.

Mina,

For the DLN, '7395289', I see only 1 record in our database.

We need another record with the same DLN, so I think last time you added an ID for this record. Would it be possible to re-add(identical information as driver B, only the doc type = 3?)

Thank you,
Siri.

Subject: RE: Smoke Test - Driver B

Mina,

Per the test plan, before I send B4/5, I think we should have 2 other records with identical driver information as driver B (we wanted the duplicates added with same DLN too, only the State document Type is different for all the records, rest of the information should be the same). Could you please let me know once they are added?

Thank you

Hi Rich,

Thanks for checking back. Yes, I updated that as well as the manual update of the UNI Site table. Sorry, I forgot I was supposed to send you the screen shots.

I'm attaching screenshots of test and production. The only difference should be the CC message, because for structured testing that needed to be a manual process. However, the CC message in production application 37 matches that for production application 02.

Is anybody aware of anything AAMVA may be doing at about 8:00 AST which is 12:00 (midnite) EST? That's probably the best time for me and I'll have to close and disable the config file which will probably disable UNI while I have it down. It shouldn't be more than 10 minutes.

Ok I found the old email where we had the same issue in test. I did run a IDCAMS REPRO with the replace option. Apparently the UNI system doesn't like that. I'll try to run the config file load tonight after hours if our system will let me close the files manually in production. If not, I'll have to try it on Sunday.

David,

Assuming you are talking about the UTB53 job when you say "The batch job an clean", it appears that you may have the wrong file in STEP0400 as the SORTIN DD. This file should have been the CONFIG file that was distributed with the revision.

Referring to the UNI Site Table, it is possible that the entries on your Test version will not match the entries in your production version. We would like to be sure that the version in your production environment is updated using the same procedure as we did in the test environment where you send me the sequential version of the file and I update it and return it to you to be loaded back into your production version of the UNSITETB file.

Please let me know if you have additional questions.

Thanks,
Rich

Hi Rich,

Thanks for checking back. Yes, I updated that as well as the manual update of the UNI Site table. Sorry, I forgot I was supposed to send you the screen shots.

I'm attaching screenshots of test and production. The only difference should be the CC message, because for structured testing that needed to be a manual process. However, the CC message in production application 37 matches that for production application 02.

Subject: RE: UNI upgrade in production

David,

Assuming you are talking about the UTB53 job when you say "The batch job an clean", it appears that you may have the wrong file in STEP0400 as the SORTIN DD. This file should have been the CONFIG file that was distributed with the revision.

Referring to the UNI Site Table, it is possible that the entries on your Test version will not match the entries in your production version. We would like to be sure that the version in your production environment is updated using the same procedure as we did in the test environment where you send me the sequential version of the file and I update it and return it to you to be loaded back into your production version of the UNSITETB file.

Please let me know if you have additional questions.

Thanks,
Rich

Mina,

One other thing that I was going to bring up tomorrow – when you updatd the Test environment you sent me a dump of the UNSITETB VSAM file in which I updated all of the appropriate entries and sent back to you to load back to your VSAM version. Are yo planning to send me the production version of this file?

Thanks,
Rich

Hi Rich,

Thanks for checking back. Yes, I updated that as well as the manual update of the UNI Site table. Sorry, I forgot I was supposed to send you the screen shots.

I'm attaching screenshots of test and production. The only difference should be the CC message, because for structured testing that needed to be a manual process. However, the CC message in production application 37 matches that for production application 02.

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is
P6DRIVERKSTRUCTURED6666
, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Mina,

Per the test plan, before I send B4/5, I think we should have 2 other records with identical driver information as driver B (we wanted the duplicates added with same DLN too, only the State document Type is different for all the records, rest of the information should be the same). Could you please let me know once they are added?

Thank you

Cc: Regmi, Ashish; Chandrasekharan, Madhu
Subject: RE: Application ID

Mina and JoLynn,

I appreciate your help with this. A couple things that I wanted to clarify is that for the first transaction MEC Verification Inquiry, App ID -12 (PDPS) would still be used for the Status Request and Response messages. The new application ID would have an impact on states for the MEC Transmission and the MEC Inquiry transactions. States will already have to upgrade UNI to accommodate the new message types as a part of these transactions.

If the states already have to upgrade UNI for NR11, is it still a significant effort to add a new application ID? Based on my understanding of how UNI works, states would have to update their UNI Site table for all entries that they will participate with on the new application, but I would have to get confirmation from the UNI team. And for Michigan, it could mean something entirely different.

I really do appreciate your feedback, the level of impact to the states is very important to our decision. Andy, feel free to chime in ;)!

Thank you!

Subject: RE: Application ID

Good Morning Mindy,

I sent your question regarding creating a new application ID to our CDL programmer and his response was very similar to Mina's. He would prefer the use of PDPS if CDLIS is problematic rather than creating an entire new application. He noted that the cost impact in terms of programming would be a concern to Michigan, as well.

Thank you,
JoLynn

Cc: Regmi, Ashish; Chandrasekharan, Madhu
Subject: RE: Application ID

Hi Mindy,

My 2 cents off the top of my head...

A new application ID would require everyone to reinstall a new UNI version (except JoLynn of course!). I see a lot of pushback on that count alone – having done it recently, it is kind of a PITA. In addition, it raises the question of exactly what messages would be sent...would we no longer be piggybacking on PDPS SG messages?

What is the perceived benefit of doing this? I'm sorry to come off negative, but it sounds to me like a great deal more work on the side of the states, so I'd like to know what the benefit we would see keeping it separate from our current applications. It's true, not everyone will have a CDLIS record, but if using CDLIS is a problem, wouldn't it be better to use PDPS rather than create a whole new application?

To: 'Andrew.Frey@dot.iowa.gov'; Peters, Mina L (DOA); JoLynn Peck
Cc: Regmi, Ashish; Chandrasekharan, Madhu
Subject: Application ID

Hello Andy, Mina and JoLynn,

I am hoping to run something by you and see what your thoughts are. We are considering the possibility of creating a new Application ID for the NR11 changes (CDLIS is app ID – 02, SPEXS is app ID – 37 and PDPS is app ID – 12 etc.). Creating a new Application ID for these changes would help to keep the application separate from CDLIS (NR11 transactions will be using CDLIS, but are not necessarily CDLIS transactions). With the new final rules that have been published recently, we thought this would be a good time to think about creating new Application IDs.

Could you give me some feedback from a state's perspective on the level of impact on your side, what would the level of effort be to add a new application ID?

I appreciate your help with this,

Thank you!

Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITSK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITSK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is
P6DRIVERKSTRUTURED6666
, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK

Thank you,

Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Sent: Wednesday, January 18, 2017 6:39 AM
To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK

Thank you,

Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Subject: RE: Smoke Test - Driver B

Mina,

Per the test plan, before I send B4/5, I think we should have 2 other records with identical driver information as driver B (we wanted the duplicates added with same DLN too, only the State document Type is different for all the records, rest of the information should be the same). Could you please let me know once they are added?

Thank you

Subject: RE: Smoke Test - Driver K

I had sent ONE message that way earlier, as I was testing the limits of my user input to see if it would let me put the wrong state in (it did, so I will add a hard stop). However, I've sent it three times since then correctly. The MO message should not affect the P6 record in any way.

To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,

Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITSAK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Sent: Wednesday, January 18, 2017 6:39 AM
To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Sent: Wednesday, January 18, 2017 6:39 AM
To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Sent: Wednesday, January 18, 2017 6:39 AM
To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Sent: Wednesday, January 18, 2017 6:39 AM
To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

To: Peters, Mina L (DOA)
Subject: RE: Smoke Test - Driver K

Ok Mina, please try K2 again, I've fixed the name on HC. Since the DDLJDL was a combination of State and DLN, it had the P6. Please use name as:

Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK

Thank you,
Siri.

From: Peters, Mina L (DOA) [<mailto:mina.peters@alaska.gov>]
Sent: Wednesday, January 18, 2017 10:29 AM
To: Holenarsipura, Subramanya
Subject: RE: Smoke Test - Driver K

Hi Siri,

I've done K1, but had some trouble finding the pointer. I finally did an IM instead of IN and found it – however, the name is different on the HC than on the pointer.

Pointer name
Last = AKALASKACDLISFIVETHREEPERMITS AK
First = DRIVERKPERMITAKK
No Suffix

HC (from state P6)
Last= AKALASKACDLISFIVETHREEPERMI
First = DRIVERKPERMITAKK
No Suffix

The set up for driver K shows there should be a suffix of JR. It also shows the DDLJDL (license number) is P6DRIVERKSTRUCTURED6666, but the pointer is DRIVERKSTRUCTURED6666

I can use the new DLN, no problem, but can you please fix your record and let me know what name to use? Having a different name at P6 than what is on the pointer will give us problems for the rest of this driver.

Subject: Medically At Risk / Older Drivers

Importance: High

I hope this email finds you well in the new year! I have some question below I hope you can help with. If you are not the contact person for this, please let me know.

1. How does law enforcement handle an encounter with a medically at risk driver licensed in another state? What is the referral process for out of state medically at risk drivers? Does your state have a referral form, if yes, can you send a copy?
2. Who can refer an unsafe driver in your state? Is this limited to law enforcement?
3. Does your state have an Older Driver Safety program or desire to start one?
4. Who is the point of contact in your state for Medical at Risk Drivers?
5. Who is the point of contact in your state for Older Driver Programs?

Thank you for your time.

Subject: RE: Feedback - Medical Variance validation issue

I am sorry, but this is still confusing to me.
Here is what I do get:

If medical certification "C" and there is a "V" restriction, there should be a validation on the Waiver/Exempt dates. - - Slide 9.

I feel there is value in this validation, but I am still open to removing the validation.

Our conversation touched on the value of still receiving the V restriction code even if the medical certification is Blank. Can we simply say Waiver/Exempt dates are required with any V restriction code?

Subject: FW: AAMVA Webinars - Register Now

Good morning,

I know we are in the throes of SPEXS, but I highly suggest some/all of you register for one of the two **Understanding the MEC Verification Inquiry (NR01) National Registry System Specification** Webinars. This is the beginning of NR2, the medical examiner's national registry. I asked at our CDL workgroup meeting yesterday, and they said that though there is a little technical, it is really high level, and this webinar is aimed at the business users.

It will really help to see what is coming, because that's something we need to start planning for, too. I know Amy E was on board with going live early on this, because so many of our customers are saying "my doctor says you should be able to get the medcert electronically". However, I don't know if that is still the desire, or if we will need to wait for New ALVIN..

Regardless, it is helpful to start to see the process.

NMVTIS State Web Interface (SWI) 3.0 - Understanding the Administrative Features

Tuesday, January 17, 2017

Tuesday, February 14, 2017

Tuesday, March 14, 2017

Tuesday, April 11, 2017

Tuesday, May 16, 2017

Tuesday, June 13, 2017

Tuesday, July 11, 2017

Tuesday, August 15, 2017

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

The NMVTIS SWI Web Application is used by the states to perform title verification and data corrections. This webinar focuses on how the states use the administrative features to oversee the states user community. A brief overview of the SWI application is also provided. The SWI application has been built so that each state manages their own user community. This includes configuring the system with organizations to which users are assigned. The state administrator is responsible for user role assignments and user account activation and deactivation. The SWI Application also includes a reporting component that allows state administrators to monitor user activity.

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt , Lead Business Analyst, AAMVA

[About this Webinar](#)

In the past, states contacted the AAMVA Help Desk directly if they needed to make a data correction. As part of the NMVTIS reengineering effort, a Help Desk feature was created to allow states to correct their title and brand data on the central site. When states perform their own data corrections the timeliness and accuracy of the data corrections improves substantially. This webinar is focused on explaining the capability of the Help Desk feature as included in the SWI. Data correction scenarios are explained and matched to the correct update operation within the SWI. A brief overview of the SWI application will also be provided.

Tuesday, July 25, 2017
Tuesday, August 29, 2017
2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

Subject: FW: AAMVA Webinars - Register Now

Good morning,

I know we are in the throes of SPEXS, but I highly suggest some/all of you register for one of the two **Understanding the MEC Verification Inquiry (NR01) National Registry System Specification** Webinars. This is the beginning of NR2, the medical examiner's national registry. I asked at our CDL workgroup meeting yesterday, and they said that though there is a little technical, it is really high level, and this webinar is aimed at the business users.

It will really help to see what is coming, because that's something we need to start planning for, too. I know Amy E was on board with going live early on this, because so many of our customers are saying "my doctor says you should be able to get the medcert electronically". However, I don't know if that is still the desire, or if we will need to wait for New ALVIN..

Regardless, it is helpful to start to see the process.

Regards,

Mina Peters

Good afternoon,

Today is the deadline for providing feedback on the **S2S Best Practices Document** and **S2S Pilot Evaluation Report**. Mina, I did see that you provided Rich with some corrections/clarifications to the Alaska-specific information in the appendices of the evaluation report back on 11/30, which is much appreciated. Did the Alaska team have any additional comments or questions on either deliverable? If not, we will assume that you are good with them as currently distributed. Please let me know. Thanks much!

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

In the past, states contacted the AAMVA Help Desk directly if they needed to make a data correction. As part of the NMVTIS reengineering effort, a Help Desk feature was created to allow states to correct their title and brand data on the central site. When states perform their own data corrections the timeliness and accuracy of the data corrections improves substantially. This webinar is focused on explaining the capability of the Help Desk feature as included in the SWI. Data correction scenarios are explained and matched to the correct update operation within the SWI. A brief overview of the SWI application will also be provided.

Understanding the MEC Verification Inquiry (NR01) National Registry System Specification

Tuesday, February 9, 2017

2:00 - 3:00 pm (ET)

Speaker

- Mindy Stephens, Sr. Business Analyst, AAMVA

- Madhu Chandrasekharan, Sr. Business Analyst, AAMVA

[About this Webinar](#)

This webinar provides a detailed explanation of the Mini Spec for the Medical Examiner Certificate (MEC) Verification Inquiry (NR01) transaction. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

Tuesday, March 28, 2017

Tuesday, April 25, 2017

Tuesday, May 30, 2017

Tuesday, June 27, 2017

Tuesday, July 25, 2017

Tuesday, August 29, 2017

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

The NMVTIS SWI Web Application is used by the states to perform title verification and data corrections. This webinar focuses on how the states use the administrative features to oversee the states user community. A brief overview of the SWI application is also provided. The SWI application has been built so that each state manages their own user community. This includes configuring the system with organizations to which users are assigned. The state administrator is responsible for user role assignments and user account activation and deactivation. The SWI Application also includes a reporting component that allows state administrators to monitor user activity.

Tuesday, February 28, 2017

Tuesday, March 28, 2017

Tuesday, April 25, 2017

Tuesday, May 30, 2017

Tuesday, June 27, 2017

Tuesday, July 25, 2017

Tuesday, August 29, 2017

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

Tuesday, August 15, 2017

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

The NMVTIS SWI Web Application is used by the states to perform title verification and data corrections. This webinar focuses on how the states use the administrative features to oversee the states user community. A brief overview of the SWI application is also provided. The SWI application has been built so that each state manages their own user community. This includes configuring the system with organizations to which users are assigned. The state administrator is responsible for user role assignments and user account activation and deactivation. The SWI Application also includes a reporting component that allows state administrators to monitor user activity.

NMVTIS State Web Interface (SWI) - How to Correct Title and Brand Data on the Central Site

Tuesday, January 24, 2017
Tuesday, February 21, 2017
Tuesday, March 21, 2017
Tuesday, April 18, 2017
Tuesday, May 23, 2017
Tuesday, June 20, 2017
Tuesday, July 18, 2017
Tuesday, August 22, 2017
2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

In the past, states contacted the AAMVA Help Desk directly if they needed to make a data correction. As part of the NMVTIS reengineering effort, a Help Desk feature was created to allow states to correct their title and brand data on the central site. When states perform their own data corrections the timeliness and accuracy of the data corrections improves substantially. This webinar is focused on explaining the capability of the Help Desk feature as included in the SWI. Data correction scenarios are explained and matched to the correct update operation within the SWI. A brief overview of the SWI application will also be provided.

NMVTIS State Web Interface (SWI) - Understanding the Administrative Features

Tuesday, February 14, 2017

Tuesday, March 14, 2017

Tuesday, April 11, 2017

Tuesday, May 16, 2017

Tuesday, June 13, 2017

Tuesday, July 11, 2017

Tuesday, August 15, 2017

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

The NMVTIS SWI Web Application is used by the states to perform title verification and data corrections. This webinar focuses on how the states use the administrative features to oversee the states user community. A brief overview of the SWI application is also provided. The SWI application has been built so that each state manages their own user community. This includes configuring the system with organizations to which users are assigned. The state administrator is responsible for user role assignments and user account activation and deactivation. The SWI Application also includes a reporting component that allows state administrators to monitor user activity.

NMVTIS State Web Interface (SWI) - How to Correct Title and Brand Data on the Central Site

Tuesday, January 24, 2017
Tuesday, February 21, 2017
Tuesday, March 21, 2017
Tuesday, April 18, 2017
Tuesday, May 23, 2017
Tuesday, June 20, 2017
Tuesday, July 18, 2017
Tuesday, August 22, 2017
2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

In the past, states contacted the AAMVA Help Desk directly if they needed to make a data correction. As part of the NMVTIS reengineering effort, a Help Desk feature was created to allow states to correct their title and brand data on the central site. When states perform their own data corrections the timeliness and accuracy of the data corrections improves substantially. This webinar is focused on explaining the capability of the Help Desk feature as included in the SWI. Data correction scenarios are explained and matched to the correct update operation within the SWI. A brief overview of the SWI application will also be provided.

Understanding the MEC Verification Inquiry (NR01) National Registry System Specification

Tuesday, February 9, 2017

2:00 - 3:00 pm (ET)

Speaker

- Mindy Stephens, Sr. Business Analyst, AAMVA

- Madhu Chandrasekharan, Sr. Business Analyst, AAMVA

[About this Webinar](#)

This webinar provides a detailed explanation of the Mini Spec for the Medical Examiner Certificate (MEC) Verification Inquiry (NR01) transaction. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

NMVTIS State Web Interface (SWI) - Instant Title Verification Using the VIN Search Feature

Tuesday, January 18, 2017

Tuesday, February 28, 2017

Tuesday, March 28, 2017

Tuesday, April 25, 2017

Tuesday, May 30, 2017

Tuesday, June 27, 2017

Tuesday, July 25, 2017

Tuesday, August 29, 2017

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

Tuesday, July 11, 2017

Tuesday, August 15, 2017

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

The NMVTIS SWI Web Application is used by the states to perform title verification and data corrections. This webinar focuses on how the states use the administrative features to oversee the states user community. A brief overview of the SWI application is also provided. The SWI application has been built so that each state manages their own user community. This includes configuring the system with organizations to which users are assigned. The state administrator is responsible for user role assignments and user account activation and deactivation. The SWI Application also includes a reporting component that allows state administrators to monitor user activity.

Tuesday, February 21, 2017
Tuesday, March 21, 2017
Tuesday, April 18, 2017
Tuesday, May 23, 2017
Tuesday, June 20, 2017
Tuesday, July 18, 2017
Tuesday, August 22, 2017
2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

In the past, states contacted the AAMVA Help Desk directly if they needed to make a data correction. As part of the NMVTIS reengineering effort, a Help Desk feature was created to allow states to correct their title and brand data on the central site. When states perform their own data corrections the timeliness and accuracy of the data corrections improves substantially. This webinar is focused on explaining the capability of the Help Desk feature as included in the SWI. Data correction scenarios are explained and matched to the correct update operation within the SWI. A brief overview of the SWI application will also be provided.

Understanding the MEC Verification Inquiry (NR01) National Registry System Specification

Tuesday, February 9, 2017
2:00 - 3:00 pm (ET)

Speaker

- Mindy Stephens, Sr. Business Analyst, AAMVA
- Madhu Chandrasekharan, Sr. Business Analyst, AAMVA

[About this Webinar](#)

This webinar provides a detailed explanation of the Mini Spec for the Medical Examiner Certificate (MEC) Verification Inquiry (NR01) transaction. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

NMVTIS State Web Interface (SWI) - Instant Title Verification Using the VIN Search Feature

Tuesday, January 18, 2017
Tuesday, February 28, 2017
Tuesday, March 28, 2017
Tuesday, April 25, 2017
Tuesday, May 30, 2017
Tuesday, June 27, 2017
Tuesday, July 25, 2017

Tuesday, August 29, 2017

2:00 - 3:00 pm (ET)

Speaker

- Neil Pitt, Lead Business Analyst, AAMVA

[About this Webinar](#)

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.
